

Paediatric Stroke Days

2nd European Paediatric Stroke Conference

8th and 9th of June 2018

Auditorium Langhans, Inselspital

Bern, Switzerland

Bern, 4th of April 2018

Dear all

We are delighted to invite you to second European Paediatric Stroke day in Bern.

We have the honor to have a group of internationally well known paediatric stroke specialists here in Bern and take the advantage to offer you two interesting days.

The first day will like to give you an update in important areas of paediatric stroke - in children but also in neonates. Topics like emergency management, recanalization options, neuroimaging, risk profiles but also outcome and reorganization will be covered.

The second day will be dedicated to research questions and discussions. After a plenary talk on how to cross the border from animal research to clinical questions, we will give you the option to present in short communications your own research ideas. Our goal will be to stimulate research in the field - so do not hesitate to discuss your ideas with international experts!

We are looking forward to two interesting days and hope to welcome many of you here in Berne.

Prof. Mark Mackay
Royals Children Hospital
Melbourne

Prof. Heather Fullerton
University of San Francisco
San Francisco

Prof. Maja Steinlin
University Children's Hospital
Bern
